- Pixel Image: 640 x 480
- Sensor: 1/4" CMOS
- Power Consumption: 280mA±15mA
- Transmission Frequency: 2400MHz~2480MHz
- Lens: f = 3.7mm
- Minimum Illumination: 1.5 LUX
- Bandwidth: 4Mbps
- Night Vision Range: 3-5m
- Battery: Li-battery
- Battery Working Time: 4 hours
- Frame: 25fps
- Power Supply: DC 5V / 1000mA
- Transmission Power: 17dBm
- Operating Temperature: 0°C ~ 50°C
- Humidity: 20%~80%RH
- Material: ABS Plastic

Wireless Screen

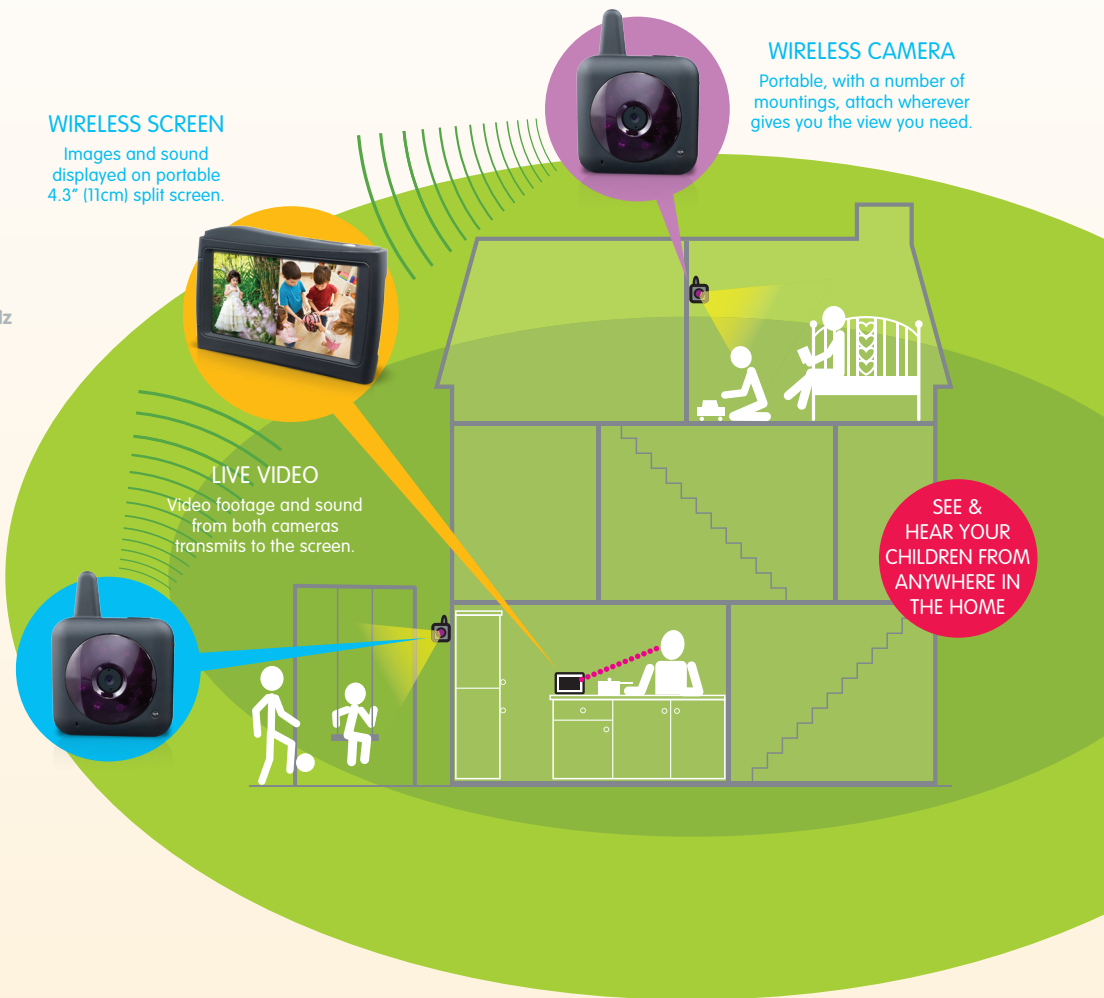

- Horizontal Resolution: 360 TV Lines
- Battery: Li-battery
- Frame: 25fps
- LCD Screen Type: 4.3" TFT-LCD
- LCD Effective Pixels: 480x272
- Receiving Sensitivity: -85dBm
- Colour Configuration: R.G.B.
- Power Supply: DC 5V / 1000mA
- Power Consumption: 300mA±15mA
- Operating Temperature: 0°C ~ 50°C
- Humidity: 20%~80%RH
- Material: ABS Plastic

WIRELESS SCREEN

Images and sound displayed on portable 4.3" (11cm) split screen.

WIRELESS CAMERA

Portable, with a number of mountings, attach wherever gives you the view you need.

KidCam offers a simple and versatile method of seeing and hearing your children across the home and garden. Two compact wireless cameras transmit a clear, full colour picture (and sound) to a portable wireless screen from which the footage of both cameras can be viewed. Both cameras incorporate night vision, so they can be used in the dark to keep an eye on sleeping babies and children.

A car adapter kit is also available separately to allow use within a vehicle whilst driving. No more looking over your shoulder to see what the kids are up to whilst driving!

Easy to use

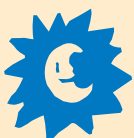

Step 1: Position the camera(s) to overlook your baby's cot or child's play area and switch on the camera(s).

Step 2: Take the screen with you across the home, wherever you need to be.

Step 3: Relax, whilst you watch and hear footage simultaneously from both cameras.
