Microsoft Surface Ergonomic Keyboard

In the past, ergonomic keyboards have sacrificed beauty to keep your hands and wrists comfortable. Not anymore. This keyboard was designed to be a place that invites you to rest your hands, protect your wrists and have the best typing experience with your Surface device.

Microsoft Surface Ergonomic Keyboard's double-cushioned palm rest uses a unique, ultradurable version of Alcantara, a proprietary material sourced in Italy that's used in luxury products. Alcantara grows richer and darker over time, making this a keyboard that ages beautifully.

The subtle changes to the keytop geometry, split space bar and naturally arched shape protect you from hand and wrist strain. We took into consideration every detail of pressing your fingers into this keyboard. For example, this keyboard uses the same precise key switch technology as our type covers, but with an extended 2.5mm key travel so the keys sit higher up.

The new Microsoft Surface Ergonomic Keyboard brings together the best of form and function, without compromise, and matches the understated elegance of our Surface products.

Specifications

Connection	Bluetooth® Low Energy-compatible 4.0 / 4.1
Product dimensions	18.11 x 9.02 x 1.36 inches 2.23 pounds including 2 batteries ¹
Operating systems	Works with Bluetooth® Smart Ready Device with Human Interface Device support
Wireless range	Up to 32 feet (10 meters)

Battery type and quantity	2 AAA alkaline batteries (included)
Battery life	Up to 12 months
Warranty	One-year limited hardware warranty ²

Microsoft Surface Keyboard

Design is in the details, and we pored over every one of them for the Surface Keyboard. Its soft gray finish is the perfect complement to your Surface and Surface Mouse, and the finishing touch to a well-thought-out desk space. You'll love the solid feel of it under your fingers as you work. It pairs seamlessly with your Surface through Bluetooth Smart, and the battery will power you for a full year.

Thoughtfully engineered travel, height, pitch and spacing help improve your typing speed and accuracy. Optimized feedback and return force prevent accidental presses and allow for smooth, consistent action.
