

Lenovo ThinkVision X24

POSITIONING STATEMENT

The new Lenovo ThinkVision X24 sets the standard for ultra-slim monitor displays. Encased in an elegant and lightweight form with an ultra-narrow bezel, the X24 is the first monitor to use pre-coated metal (PCM) surface technology for a non-traditional rear cover to enhance any workspace appearance. Built for users who require crystal clear imaging and high performance for their work and play, the X24 is an ideal monitor solution to achieve stunning visual results and ease of use.

KEY FEATURES

- Gorgeous screen with an extreme level of thinness at 7.5mm, ideal for space-savings and design
- Non-traditional PCM technology for an eye-catching rear monitor display
- New generation Neo-Blade panel for a virtually unobstructed view for side-by-side dual-monitor set up
- 23.8-inch display with high resolution FHD in-plane switching (IPS) panel for a stunning visual experience
- Sturdy metal chrome stand with a tilt-adjustable hinge for easy viewing
