Product features

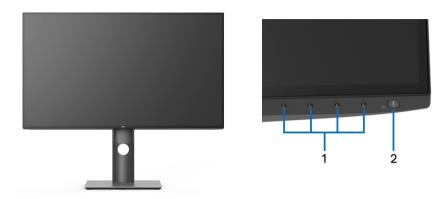

The **Dell U3219Q** monitor has an active matrix, Thin-Film Transistor (TFT), Liquid Crystal Display (LCD) and LED backlight. The monitor features include:

- 80 cm (31.5-inch) viewable area (measured diagonally).
 3840 x 2160 (16:9) resolution, plus full-screen support for lower resolutions.
- Wide viewing angle to allow viewing from a sitting or standing position.
- Color gamut of 99% sRGB, 95% DCI-P3, and 99% REC-709 with an average Delta E \leq 2.0.
- · Digital connectivity with DisplayPort, USB Type-C and HDMI.
- Single USB Type-C to supply power (PD 90 W) to a compatible notebook while receiving video & data signal.
- · Tilt, swivel, height, and rotate adjustment capabilities.
- Ultra-thin bezel minimizes the bezel gap in multi-monitor usage, enabling easier setup with an elegant viewing experience.
- Removable stand and Video Electronics Standards Association (VESA™) 100 mm mounting holes for flexible mounting solutions.
- Equipped with 2 USB upstream ports (USB Type-B and USB Type-C) and 4 USB downstream ports.
- Plug and play capability if supported by your system.
- On-Screen Display (OSD) adjustments for ease of set-up and screen optimization.
- Security lock slot.
- Stand lock.
- 0.5 W standby power when in sleep mode.
- Supports Picture by Picture (PBP) and Picture in Picture (PIP) Select mode.
- · Optimize eye comfort with a flicker-free screen.
- MARNING: The possible long-term effects of blue light emission from the monitor may cause damage to the eyes, including eye fatigue, digital eye strain, and so on. ComfortView feature is designed to reduce the amount of blue light emitted from the monitor to optimize eye comfort.

Power management modes

If you have VESA's DPM[™] compliance display card or software installed on your computer, the monitor can automatically reduce its power consumption when not in use. This is referred to as **Power Save Mode***. If the computer detects input from the keyboard, mouse, or other input devices, the monitor automatically resumes to function. The following table shows the power consumption and signaling of this automatic power saving feature.

| VESA modes | Horizontal sync | Vertical sync | Video | Power indicator | Power consumption |
|---------------------|--------------------|------------------|---------|---------------------|--|
| Normal operation | Active | Active | Active | White | 230 W (maximum)** 46 W (typical) |
| Active-off mode | Inactive | Inactive | Blanked | White (blinking) | Less than 0.5 W |
| Switch off | - | - | - | Off | Less than 0.3 W |

| Energy Star | Power consumption |
|------------------|-------------------|
| Pon | 43.18 W |
| E _{TEC} | 135.70 kWh |

* Zero power consumption in OFF mode can only be achieved by disconnecting the main cable from the monitor.

** Maximum power consumption with max luminance, and USB active.

This document is informational only and reflects laboratory performance. Your product may perform differently, depending on the software, components and peripherals you ordered and shall have no obligation to update such information. Accordingly, the customer should not rely upon this information in making decisions about electrical tolerances or otherwise. No warranty as to accuracy or completeness is expressed or implied.

NOTE: This monitor is ENERGY STAR certified.

MOTE:

Pon: Power consumption of on mode as defined in Energy Star 7.0 version.

E_{TEC}: Total energy consumption in kWh as defined in Energy Star 7.0 version.

Plug and play capability

You can install the monitor in any Plug and Play-compatible system. The monitor automatically provides the computer system with its Extended Display Identification Data (EDID) using Display Data Channel (DDC) protocols so that the system can configure itself and optimize the monitor settings. Most monitor installations are automatic; you can select different settings if desired. For more information about changing the monitor settings, see Operating the monitor.

Universal Serial Bus (USB) interface

This section gives you information about the USB ports that are available on the monitor.

NOTE: This monitor is Super-Speed USB 3.0 compatible.

NOTE: USB 3.0 functionality requires a USB 3.0-capable computer.

NOTE: The USB ports on the monitor work only when the monitor is turned On or in power save mode. If you turn Off the monitor and then turn it On, the attached peripherals may take a few seconds to resume normal functionality.

LCD monitor quality and pixel policy

During the LCD Monitor manufacturing process, it is not uncommon for one or more pixels to become fixed in an unchanging state which are hard to see and do not affect the display quality or usability. For more information on Dell Monitor Quality and Pixel Policy, see www.dell.com/support/monitors.

Maintenance guidelines

Cleaning your monitor

△ CAUTION: Read and follow the Safety instructions before cleaning the monitor.

MARNING: Before cleaning the monitor, unplug the monitor power cable from the electrical outlet.

For best practices, follow the instructions in the list below when unpacking, cleaning, or handling your monitor:

- To clean your anti-static screen, lightly dampen a soft, clean cloth with water. If possible, use a special screen-cleaning tissue or solution suitable for the anti-static coating. Do not use benzene, thinner, ammonia, abrasive cleaners, or compressed air.
- Use a lightly-dampened, warm cloth to clean the monitor. Avoid using detergent of any kind as some detergents leave a milky film on the monitor.
- If you notice white powder when you unpack your monitor, wipe it off with a cloth.
- Handle your monitor with care as a darker-colored monitor may get scratched and show white scuff marks more than a lighter-colored monitor.
- To help maintain the best image quality on your monitor, use a dynamically changing screen saver and turn off your monitor when not in use.

DEL

Setting up the monitor

Attaching the stand

NOTE: The stand is not installed at the factory when shipped.

NOTE: The following instructions are applicable only for attaching the stand that was shipped with your monitor. If you are attaching a stand that you purchased from any other source, follow the set up instructions that were included with the stand.

To attach the monitor stand:

- 1. Follow the instructions on the flaps of carton to remove the stand from the top cushion that secures it.
- 2. Insert the stand base blocks fully into the stand slot.
- **3.** Lift the screw handle and turn the screw clockwise.
- 4. After fully tightening the screw, fold the screw handle flat within the recess.

5. Lift the cover, as shown, to expose the VESA area for stand assembly.

- 6. Attach the stand assembly to the monitor.
 - **a.** Fit the two tabs on the upper part of the stand to the groove on the back of the monitor.
 - **b.** Press the stand down till it snaps into place.

7. Place the monitor upright.

NOTE: Lift the monitor carefully to prevent it from slipping or falling.

8. Remove the cover from the monitor.

Connecting your monitor

 \bigwedge WARNING: Before you begin any of the procedures in this section, follow the Safety instructions.

NOTE: Route the cables through the cable-management slot before connecting them.

NOTE: Do not connect all cables to the computer at the same time.

NOTE: The graphics are used for the purpose of illustration only. Appearance of the computer may vary.

To connect your monitor to the computer:

- **1.** Turn Off your computer and disconnect the power cable.
- 2. Connect the DisplayPort, HDMI, or USB Type-C cable from your monitor to the computer.

Connecting the DisplayPort (DisplayPort to DisplayPort) cable

```
NOTE: The default out of factory setting is DP1.4 (DP1.2 is supported).
   If the monitor fails to show any content after the DisplayPort cable is
   connected, follow the procedures below to change the settings to
   DP1.1:
```

- Press any button (except the U button) to activate the OSD menu.
- Use the 🗬 and 🌱 buttons to highlight Input Source, then use the 🔮 button enter the submenu.
- Use the \bigcirc and \bigcirc buttons to highlight **DP**.
- Press and hold the 💙 button for approximately 10 seconds, and the DisplayPort configuration message appears.

Use the V button to select Disable and change the settings.

Repeat the above steps to change the DisplayPort format settings if necessary.

Connecting the HDMI cable (optional)

- NOTE: The default out of factory setting is HDMI 2.0. If the monitor fails to show any content after the HDMI cable is connected, follow the procedures below to change the settings from HDMI 2.0 to HDMI 1.4:
 - Press any button (except the U button) to activate the OSD menu.
 - Use the and buttons to highlight Input Source, then use the button enter the submenu.
 - Use the 🜍 and 🜍 buttons to highlight **HDMI**.
 - Press and hold the v button for approximately 10 seconds, and the HDMI configuration message appears.
 - Use the value button to select **Disable** and change the settings.

Repeat the above steps to change the HDMI format settings if necessary.

Connecting the USB Type-C cable

NOTE: Use the USB Type-C cable shipped with monitor only.

- This port supports DisplayPort Alternate Mode (DP 1.4 standard only).
- The USB Type-C power delivery compliant port (PD Version 2.0) delivers up to 90 W of power.
- If your notebook requires more than 90 W to operate and the battery is drained, it may not be powered up or charged with the USB PD port of this monitor.

Connecting the USB 3.0 cable

NOTE: To prevent data damage or loss, before changing USB upstream ports, make sure that NO USB storage devices are in use by the computer connected to the monitor's USB upstream port.

After you have completed connecting the DisplayPort/HDMI/USB Type-C cable, follow the procedures below to connect the USB 3.0 cable to the computer and complete your monitor setup:

- 1. a. Connect one computer: connect the upstream USB 3.0 port (cable supplied) to an appropriate USB 3.0 port on your computer.
 - b. Connect two computers*: connect the upstream USB 3.0 ports to

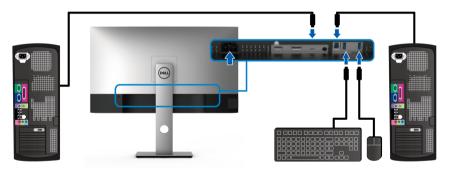

31

appropriate USB 3.0 ports on the two computers. Then use the OSD menu to select between the two USB upstream sources and input sources. See USB Select Switch.

- **2.** Connect the USB 3.0 peripherals to the downstream USB 3.0 ports on the monitor.
- **3.** Plug the power cables for your computer(s) and monitor into a nearby outlet.

a. Connect one computer

b. Connect two computers

* When connecting two computers to the monitor, the monitor's USB downstream ports for the keyboard and mouse can be assigned to different input signals from the two computers by changing the **USB Selection** settings from the OSD menu. (See USB Select Switch for details).

- **4.** Turn On the monitor and the computer(s). If your monitor displays an image, installation is complete. If it does not display an image, see Universal Serial Bus (USB) specific problems.
- 5. Use the cable slot on the monitor stand to organize the cables.

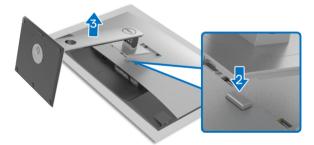

Organizing your cables

After attaching all necessary cables to your monitor and computer, (See **Connecting your monitor** for cable attachment,) organize all cables as shown above.

Removing the monitor stand

- NOTE: To prevent scratches on the LCD screen when removing the stand, ensure that the monitor is placed on a soft, clean surface.
- NOTE: The following instructions are applicable only for attaching the stand that was shipped with your monitor. If you are attaching a stand that you purchased from any other source, follow the set up instructions that were included with the stand.

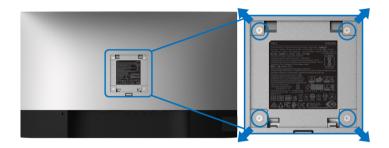

To remove the stand:

- 1. Place the monitor on a soft cloth or cushion.
- 2. Press and hold the stand release button.
- **3.** Lift the stand up and away from the monitor.

DEL

VESA wall mounting (optional)

(Screw dimension: M4 x 10 mm).

Refer to the instructions that come with the VESA-compatible wall mounting kit.

- 1. Place the monitor panel on a soft cloth or cushion on a stable flat table.
- 2. Remove the stand. (See Removing the monitor stand)
- **3.** Use a Phillips crosshead screwdriver to remove the four screws securing the plastic cover.
- 4. Attach the mounting bracket from the wall mounting kit to the monitor.
- **5.** Mount the monitor on the wall. For more information, see the documentation that shipped with the wall mounting kit.
- NOTE: For use only with UL-listed wall mount bracket with minimum weight or load bearing capacity of 23.2 kg.

OSD warning message

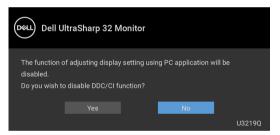

When the monitor does not support a particular resolution mode, you will see the following message:

This means that the monitor cannot synchronize with the signal that it is receiving from the computer. See **Monitor specifications** for the Horizontal and Vertical frequency ranges addressable by this monitor. Recommended mode is 3840 x 2160.

NOTE: The message may be slightly different according to the connected input signal.

You will see the following message before the DDC/CI function is disabled:

When the monitor goes into power-save mode, the following message appears:

NOTE: The message may be slightly different according to the connected input signal.

Activate the computer and wake up the monitor to gain access to the OSD.

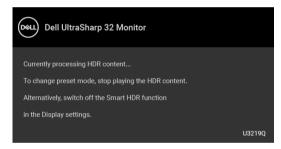

The OSD functions only in the normal operation mode. If you press any button other than the power button during the Active-off mode, the following message will appear depending on the selected input:

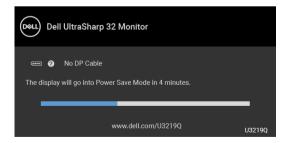

Activate the computer and the monitor to gain access to the OSD.

NOTE: The message may be slightly different according to the connected input signal.

When **Smart HDR** is activated and you try to change the preset mode, the following message appears:

If either USB Type-C, DisplayPort, or HDMI input is selected and the corresponding cable is not connected, a floating dialog box as shown below appears.

NOTE: The message may be slightly different according to the connected input signal.

See Troubleshooting for more information.

Setting the maximum resolution

To set the maximum resolution for the monitor:

In Windows[®] 7, Windows[®] 8, and Windows[®] 8.1:

- 1. For Windows[®] 8 and Windows[®] 8.1 only, select the Desktop tile to switch to classic desktop.
- 2. Right-click on the desktop and click Screen Resolution.
- 3. Click the dropdown list of the Screen Resolution and select 3840 x 2160.
- 4. Click OK.

In Windows[®] 10:

- **1.** Right-click on the desktop and click **Display settings**.
- 2. Click Advanced display settings.
- 3. Click the dropdown list of **Resolution** and select 3840 x 2160.
- 4. Click Apply.

If you do not see 3840 x 2160 as an option, you may need to update your graphics driver. Depending on your computer, complete one of the following procedures:

If you have a Dell desktop or portable computer:

• Go to http://www.dell.com/support, enter your service tag, and download the latest driver for your graphics card.

If you are using a non-Dell computer (portable or desktop):

- Go to the support site for your computer and download the latest graphic drivers.
- · Go to your graphics card website and download the latest graphic drivers.

Requirements to view or playback HDR content

(1) via Ultra BluRay DVD or Game consoles

Ensure the DVD player and Game consoles are HDR capable, e.g. Panasonic DMP-UB900, x-Box One S, PS4 Pro. Download and install the appropriate graphics card drivers (for PC applications), see below.

(2) via PC

Ensure the graphics card used is HDR capable, i.e., HDMI2.0a (with HDR option) compliant and HDR graphics driver is installed. HDR capable player application must be used, e.g. Cyberlink PowerDVD 17, Windows 10 Movies and TV app.

For example Dell XPS8910, Alienware Aurora R5, bundled with the below graphics cards.

Dell Graphics driver with HDR support: Refer to Dell support page to download the latest graphics driver that supports HDR playback for your PC/Notebook.

Nvidia

HDR capable Nvidia graphics cards: GTX1070, GTX1080, P5000, P6000, etc, For a full range of HDR capable Nvidia graphics cards, refer to Nvidia website www.nvidia.com

Driver that supports Full Screen Playback mode (e.g. PC games, UltraBluRay players). HDR on Win 10 Redstone 2 OS: 381.65 or later.

AMD

HDR capable AMD graphics cards; RX480, RX470, RX460, WX7100, WX5100, WX4100, etc. For a full range of HDR capable AMD graphics cards, refer to www.amd.com. Check HDR driver support information and download the latest driver from www.amd.com

Intel (Integrated Graphics)

HDR capable system: CannonLake or later

Suitable HDR player: Windows 10 Movies and TV app

OS with HDR support: Windows 10 Redstone 3

Driver with HDR support: visit downloadcenter.intel.com for the latest HDR driver

NOTE: HDR playback via OS (e.g. playback of HDR in a window within desktop) requires Win 10 Redstone 2 or later with appropriate player applications, e.g. PowerDVD17. Playing back protected content will require appropriate DRM software and/or hardware, e.g. Microsoft Playready[™]. Refer to Microsoft website for HDR support information.

Using the tilt, swivel, and vertical extension

NOTE: The following instructions are applicable only for attaching the stand that was shipped with your monitor. If you are attaching a stand that you purchased from any other source, follow the set up instructions that were included with the stand.

Tilt, swivel

With the stand attached to the monitor, you can tilt and swivel the monitor for the most comfortable viewing angle.

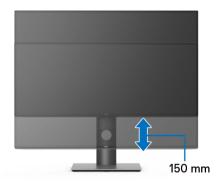

NOTE: The stand is not installed at the factory when shipped.

Vertical extension

NOTE: The stand extends vertically up to 150 mm. The figure below illustrates how to extend the stand vertically.

Rotating the monitor

Before you rotate the monitor, your monitor should be fully vertically extended (Vertical extension) and fully tilted up to avoid hitting the bottom edge of the monitor.

DELL

Rotate clockwise

Rotate counterclockwise

- NOTE: To use the Display Rotation function (Landscape versus Portrait view) with your Dell computer, you require an updated graphics driver that is not included with this monitor. To download the graphics driver, go to www.dell.com/support and see the Download section for Video Drivers for latest driver updates.
- NOTE: When in the Portrait View Mode, you may experience performance degradation in graphic-intensive applications (3D Gaming and etc.).

Adjusting the rotation display settings of your system

After you have rotated your monitor, you need to complete the procedure below to adjust the Rotation Display Settings of your system.

NOTE: If you are using the monitor with a non-Dell computer, you need to go the graphics driver website or your computer manufacturer website for information on rotating the 'contents' on your display.

To adjust the Rotation Display Settings:

- 1. Right-click on the desktop and click **Properties**.
- 2. Select the Settings tab and click Advanced.
- **3.** If you have an ATI graphics card, select the **Rotation** tab and set the preferred rotation.
- If you have an nVidia graphics card, click the nVidia tab, in the left-hand column select NVRotate, and then select the preferred rotation.
- **5.** If you have an Intel[®] graphics card, select the **Intel** graphics tab, click **Graphic Properties**, select the **Rotation** tab, and then set the preferred rotation.
- NOTE: If you do not see the rotation option or it is not working correctly, go to www.dell.com/support and download the latest driver for your graphics card.

Troubleshooting

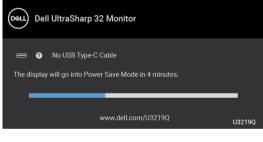

∧ WARNING: Before you begin any of the procedures in this section, follow the Safety instructions.

Self-test

Your monitor provides a self-test feature that allows you to check whether your monitor is functioning properly. If your monitor and computer are properly connected but the monitor screen remains dark, run the monitor self-test by performing the following steps:

- **1.** Turn off both your computer and the monitor.
- 2. Unplug the video cable from the back of the computer.
- **3** Turn on the monitor

The floating dialog box should appear on-screen (against a black background), if the monitor cannot sense a video signal and is working correctly. While in self-test mode, the power LED remains white. Also, depending upon the selected input, one of the dialogs shown below will continuously scroll through the screen.

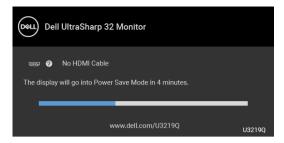

or

DEL

- 4. This box also appears during normal system operation, if the video cable becomes disconnected or damaged.
- 5. Turn Off your monitor and reconnect the video cable; then turn On both your computer and the monitor.

If your monitor screen remains blank after you use the previous procedure, check your video controller and computer, because your monitor is functioning properly.

Built-in diagnostics

Your monitor has a built-in diagnostic tool that helps you determine if the screen abnormality you are experiencing is an inherent problem with your monitor, or with your computer and video card.

NOTE: You can run the built-in diagnostics only when the video cable is unplugged and the monitor is in self-test mode.

To run the built-in diagnostics:

- 1. Ensure that the screen is clean (no dust particles on the surface of the screen).
- 2. Unplug the video cable(s) from the back of the computer or monitor. The monitor then goes into the self-test mode.

- **3.** Press and hold **Button 1** on the front panel for 5 seconds. A gray screen appears.
- **4.** Carefully inspect the screen for abnormalities.
- 5. Press **Button 1** on the front panel again. The color of the screen changes to red.
- 6. Inspect the display for any abnormalities.
- **7.** Repeat steps 5 and 6 to inspect the display in green, blue, black, white, and text screens.

The test is complete when the text screen appears. To exit, press **Button 1** again.

If you do not detect any screen abnormalities upon using the built-in diagnostic tool, the monitor is functioning properly. Check the video card and computer.
