

DisplayPort to HDMI Active Video and Audio Adapter Converter - DP to HDMI - 1920x1200 - White

StarTech ID: DP2HDSW

The DP2HDSW Active DisplayPort® to HDMI® Adapter features audio pass-through support, which enables you to connect both the audio and video that's output from a DisplayPort-equipped desktop or laptop computer to an HDMI monitor, projector, or display.

Unlike a passive adapter, the DP2HDS actively converts single-mode and dual mode DisplayPort output, which is ideal for graphics cards that do not output dual mode/multi-mode (DP++) signals, such as ATI™ Eyefinity cards.

This active DP to HDMI adapter is compatible with Intel® Thunderbolt™, when connected directly to a supporting DisplayPort over Thunderbol I/O port.

Backed by a StarTech.com 2-year warranty and free lifetime technical support.

Applications

- Re-purpose an existing HDMI monitor or projector for use with a new DisplayPort-equipped computer or as a secondary display
- Ideal for digital entertainment centers, home offices, business conference rooms and trade show displays

Features

- Supports resolutions up to 1920x1200 (WUXGA)
- Latching DisplayPort connector port
- DisplayPort 1.1a, HDCP 1.3 compliant
- 5.1 Surround Sound Audio Pass-through
- Works with video cards that aren't capable of outputting DP++ (multi-mode) signals
