## Fast And Compact USB Hub Connectivity

Running low on USB2 ports on your notebook or desktop? Need to connect multiple USB2 devices to your computer at any one time?

The compact **USB-H41** is a feature-rich and totally travel friendly, compact USB hub, ideal for when you need extra USB2 ports (or of course USB1.1) but don't have enough spare USB ports.

Ideal for connecting card readers, printers, wireless devices and much more besides. For added peace of mind the USB-H41 also features integral over-current protection which protected connect USB devices from the initial current surge when connected to your host computer.

Stylish in design, self-powered and ideal for almost all operating systems and project computers.

## specifications:

USB2.0 up to 480Mbps - 4 Port USB Hub

**Compact, self-powered with integral USB host cable**

Individual, over-current protection on all ports

**Plug n' Play with all operating systems**

Stylish in design and driveless in operation

**Compatible with all USB2.0 and USB3.0 peripherals**
