

If you're looking for a simple and low-cost outdoor surveillance system that allows you to access video and images on your PC or Smartphone, this IP camera from Storage Options is the perfect choice.

With a high quality digital video camera and night vision of up to 10 metres, this camera will deliver images around the clock. It transmits images at up to 30 frames per second on a LAN or WAN by using MJPEG hardware compression technology. With weatherproof housing and an adjustable bracket for mounting on either wall or ceiling, you can be sure this camera is versatile enough to be mounted in the optimum position.

This camera transmits remote video over your TCP/IP network so you can choose to view images on your desktop or Smartphone in real time from anywhere on your local network, or over the Internet. So wherever you happen to be, you can keep an eye on your property with just a few clicks. You can also record to your PC hard drive to store images for future use.
