UNPACKING

Make sure all following items are in the packaging:

! Save the packaging for later use. You will need the serial number found on the side of the packaging.

1. CONNECTING THE CAMERA TO YOUR ROUTER

- 1) Connect the power adapter to the camera.
- 2) Connect one end of the network cable to your camera and the other to an open port on your router.

✓ Once setup is complete, you will no longer need the network cable and the camera will connect to your WiFi network.

- 3) The camera status LED will be red for about one minute. When the camera is ready for use, the status LED will change to solid green.

! If your WiFi router supports WPS feature, refer to the user manual to connect via WPS button.

2-1. SETTING UP YOUR ACCOUNT FROM MOBILE PHONE

- ✓ Download the Samsung Smartcam App on to your Android phone or your iPhone.
- ✓ Search keywords for the application: "Samsung SmartCam", "Smartcam", "SAMSUNG TECHWIN", "TECHWIN".

- 1) Run the downloaded application.
- 2) Tap <Sign up here>.

- 3) Enter requested information.
- 4) Check "Agree to the terms and conditions", and tap <Register>.
 - ID : Create user ID using letters, numbers and periods between 8-14 characters.
 - PW : Create password using letters and numbers except colons and commas between 8-14 characters.
 - Confirm Password : Checks whether your password is entered correctly.
 - Name : Enter your name.
 - E-mail : Email address is used to recover your account password.

2-2. ADDING YOUR CAMERA

- 1) Log-in.
- 2) Tap <Add Camera>.
- 3) Select the camera found and tap <next>.
 - ✓ When your smartphone is connected to the same WiFi network as the camera, it will automatically search for the camera.

- 4) If the camera is not detected, please enter the camera serial number manually.
 - ✓ Tap on [?] for more information.

- 5) Create the <Camera password> and <Camera Name>, and then tap <Add>.
 - ✓ Create camera password using alphanumeric characters between 1 to 8 without any space. Example: 1234
- 6) Tap <Go To Camera List>.
 - ✓ If you want to add another camera, Tap <Register new camera>.

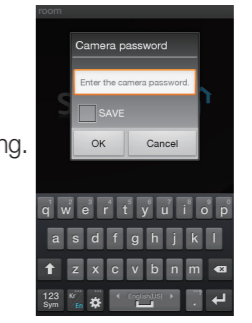

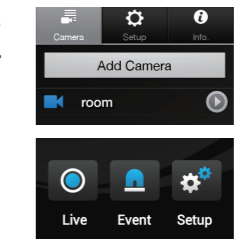

2-3. CONNECTING CAMERA TO WI-FI NETWORK

- 1) From the camera list, tap on the [?] for camera options.
- 2) Tap on <Setup> icon.
- 3) Enter the camera password you created for this camera and Tap <OK>.
- 4) Tap on <Network setting>.
- 5) Turn WiFi on.
- 6) Select your WiFi network and enter your WiFi network password.
 - Other WiFi Networks : Enter the SSID name and password to connect to the network.
- 7) Tap <OK> and unplug the network cable from the camera and the router.
 - ✓ The camera LED will change from flashing blue to solid green within 30 seconds. This confirms the camera is connected to your WiFi network. You can now unplug the camera and place the camera anywhere within your wireless network range. If the camera LED did not change to solid green, please contact our tech support at 1-877-349-3149.

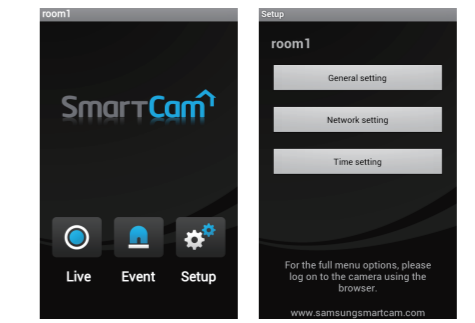

2-4. VIEWING LIVE VIDEO

- 1) Tap on the camera icon [?] to view live video. Tap on the arrow icon [?] for camera options.
- 2) Enter the <Camera password> for the camera selected. This is the same camera password you created at the time you registered the camera. Check the <SAVE> option to save the camera password. Within 20 seconds, it will start streaming.
 - ✓ Video loading time will vary depending on your internet connection.

2-5. CAMERA SETUP

Tap the <Setup> icon to configure a camera to be monitored.

❖ General setting

- 1) Tap <General setting>.
- 2) Configure the basic camera settings.
 - Camera Name : Camera name is used to easily identify the camera when you have more than one. i.e., Living room, Kitchen, Bedroom.
 - Event Alarm : Specify whether to trigger the alarm or not, and specify the sensitivity. The higher the sensitivity is, the subtler motion/audio events will be detected.
 - Night Vision : Set the IR lighting. Check <Night Vision> to set the camera to switch to the night vision mode automatically.
 - Audio : Adjust the volume of the built-in microphone and speaker of the camera as appropriate.
- 3) Configure the notification.
 - Push Notification : Check to receive push notification to your phone.
 - YouTube : Tap [?] to enter your YouTube account information to upload 30 video clips to your YouTube account when event is detected.
 - Picasa : Tap [?] to enter your Picasa account information to upload a picture to your Picasa account when event is detected.

❖ Time setting

- 1) Tap <Time setting>.
- 2) Set the camera's clock.
 - Time Zone : Select your region.
 - Summer Time : Check this option if you live in a country or region where DST(Daylight Saving Time) is applied.

3-1. SETTING UP YOUR ACCOUNT FROM COMPUTER

1) From your PC, launch your web browser.

- ✔ Supported browsers: Internet Explorer 8+, Chrome, FireFox, Safari

2) Go to <http://www.samsungsmartcam.com>.

3) Click <Starting SmartCam>.

- ✔ You need to install your plug-in to automatically search for cameras connected to the network and view the video in your camera.

4) Create user ID between 8 to 14 alphanumeric character. You can use letters, numbers and periods.

5) Create password between 8 to 14 alphanumeric character. You can use letters, numbers, periods and commas between 8-14 characters.

6) Confirm Password.

7) Enter rest of the requested information and click <Sign Up>.

3-2. ADDING YOUR CAMERA

1) Click <Yes> in the pop-up window of camera registration after completing your member sign-up.

2) Click <Next> if the camera LED status is solid green.

3) Select the serial number of the camera to be added from the camera search list.

If the camera is not found, enter the serial number manually.

- ✔ The computer and the camera has to be on the same network router to auto detect the cameras.

4) Click <Next>.

5) Create <Camera Name> and <Camera password>.

- ✔ Create camera password using alphanumeric characters between 1 to 8 without any space. Example: 1234

6) Click <Next>.

3-3. CONNECTING CAMERA TO WI-FI NETWORK

1) After adding the camera, click <Yes> in the wireless network setup pop-up window.

2) Select your Wireless Network from the list.

- ✔ If your Wireless Network is hidden, select <Other Wi-Fi Networks (not listed)>.

3) Enter the password of your Wireless Network and click <Next>.

- ✔ Select <Display password> to display the password.

4) Click <OK>.

5) Unplug the network cable from the camera and the router.

- ✔ The camera LED will turn from flashing blue to solid green in 30 seconds. This confirms the camera is connected to your wireless network range. You can now unplug and place the camera anywhere within your wireless network range. If the camera LED did not turn solid green, please contact our tech support at 1-877-349-3149.

6) Click <Finish> if the <Finish> button is activated.

3-4. VIEWING LIVE VIDEO

1) Click <Go To My SmartCam>.

2) Select a camera from the camera list at the upper left hand of the screen.

3) Enter the camera password and click <Apply>.

- ! If you forget the camera password, it must be reset. Please refer to the user manual for details.

- ✔ Check <Remember> to connect the camera without entering the camera password.

4) When viewing the camera for the first time, you must install the web viewer plug-in. Please click on the <Download Plug-in> and install the plug-in. Browser will be restarted and you have to re-login to your account.

3-5. ALARM & NOTIFICATION

1) Click <Setup>.

2) Select the <Alarm & Notification> tab.

3) Check <Motion Sensitivity> for motion detection. Check <Audio Sensitivity> for audio detection.

4) Adjust the sensitivity.

5) Configure the alarm receipt method.

- ! Configure Gmail account and password first to use YouTube/Picasa/Gmail.
